# Foreword

The Industrial Data book 2022 is an effort to support the Industrialists, in coping with current economic challenges, and contribute to their sustainable socioeconomic development through streamlining the vital process of productive decision making. This Data book focuses on the statistical factors effecting the economic growth specifically concerning the export expansion.

The statistical analyses given in this Data book are based on comprehensive statistical accounts drawn from the Department of Census and Statistics (DCS), Department of Customs (DoC), Export Development Board (EDB) and the Central Bank of Sri Lanka (CBSL) as a reference.

This publication includes statistical references pertaining to exports and imports including the tables on productivity indicators prepared based on Manufacturing establishments and number of persons engaged in each sector, statistics on Principal indicators of Industrial Activity from year 2015 to 2019, value of outputs and output components, value of intermediate consumptions, employment by nature, statistics on Economic indicators of industrial activities classified by industry class and statistics on imports and exports.

I am grateful to the Director General, Planning Division, Ministry of Industries Mr. Aruna Bandara and his team for the immense support given in this endeavor. Further, my heartfelt gratitude goes to Ms. Rajitha Wijesinghe, Statistician, Ministry of Industries and her team members Mr. Nirosh Chathuranga Pathiraja and Mr. Shamith Rashmika Jayawardane for their well-committed contribution and tremendous effort to make this a reality while working in collaboration with the DCS. Also, I would like to thank Ms. Chamari Fonseka, Deputy Director, and Mr. Umesh Hapuarachchi, Information and Communication Technology Officer of the Information Technology Division for their contribution in providing the write-ups and cover page designs.

I strongly believe that this Industrial Data book 2022 will serve a valuable purpose on the present and future status of productivity and economic growth in industrial sectors, while influencing prolific process of policymaking in the industry sectors. I am of the view that this publication would be beneficial for all levels of industrial data consumers including policy makers, economic planners, academics, researches and any other interested parties in future.

*J.M. Thilaka Jayasundara*

# Overview

Ceramic, Porcelain, Tile and Granite sector consist of the subsectors of manufacturing Tableware, kitchen ware, home ware, Ornamental ware, Sanitary ware, Floor tiles, wall tiles, Red Clay Roof Tiles, Glass bottles and jars, Cut stone products and Craft pottery.

Total export earnings from the sector amounted to USD 61 million by the end of 2021. During 2021 the table ware sector was the highest contributor to the sector exports which amounted to USD 23 million. That is a 58% increase in the table ware exports compared to year 2020 which recorded USD 14.5 million. Floor tiles and wall tiles exports amounted to USD 7.9 million in 2021 compared to USD 4.9 million export earnings recorded in 2020. Ornamental ware sector is reported as the third highest sector of export earnings of the sector which amounted to USD 3.9 million.

The Sector Contributed 0.31 % to total merchandise exports in year 2021. This is while receiving USD 7.6 million from USA, the largest buyer of the sector. India, Australia, Japan, UK, Germany and Italy, are the major buyers of Ceramic and Tile products of Sri Lanka. Sector contribution to GDP stands at approximately 0.16%.

The industry provides direct employment for about 30,000 people and indirect employment for more than 20,000 people. The tableware and ornamental ware sector employed 16,000 to 18,000 while the tile sector accounts for 2,000 - 4,000 employees.

Ceramic, Porcelain, Tile and Granite sector mainly imports High Quality Ball Clay, High Quality Kaolin, Unfinished stone, Soda Ash, High quality Plaster for moulds, Alumina, Colour Pigments and additives which accounted for USD 150 million in 2021. Floor tile and wall tile imports has declined by around 70% from imports amounted to USD 20 million recorded in 2020 to USD 5 million recorded in 2021.

Figure 1: Exports Value of Ceramic, Porcelain, Tile & Granite Products Industry

Source; Export Development Board

In early 2020, Sri Lanka did not have the capacity to fulfil the demand of bath ware in the country.

Due to government requests to increase manufacturer capacities, a number of factories were set up with investments of up to nearly Rs. 20 billion. This significantly increased capacity helped the industry reach its desired target within a span of two years.

Currently, the Tile Sector Annual production capacity is 16.0 Mnsqm. The local tile cluster is on a low base with the per capita tile consumption only at 0.6m<sup>2</sup> compared to Europe at 6m<sup>2</sup> per person, Brazil 2.5m<sup>2</sup> per person and China at 2m<sup>2</sup> per person. Low per capita tile consumption in Sri Lanka proves that there is ample room for the tile sector to grow. At present, floor tiles contribute 77% whilst wall tiles contribute 23% to the local tile cluster.

All Sri Lankan Porcelain Tableware products conform to Food & Drug Administration (FDA) norms ASTM Standards. The tableware and kitchenware exports amount to around 63 per cent of the country's total ceramic exports. There are three key players in the country and their main export markets are India, USA, Japan, UAE, and Sweden.

Sri Lanka manufactures Bath ware & sanitary ware for both domestic & international markets. The product quality conforms to British standard specification BS EN 3402-1962, thereby ensuring that the products will be on par with that of any leading European manufacturer in terms of both design and quality.

Sri Lanka has the availability of a highly skilled and literate workforce. Aplenty of trained and gifted designers, chemists, technologists and engineers provide a highly productive workforce. Sri Lanka is blessed with high quality mineral deposits like Quartz, Feldspar, Silica Sand, Dolomite, Kaolin and Ball clay which are essential for ceramic. The outstanding quality and purity of these materials contribute to the high standard of the products.

Going in line with the global trends, Sri Lanka has to convert from traditional ceramics into technical and advanced ceramic adopting Innovative thinking in terms of design and product ideas There is a high requirement for ceramic engineers, material science graduates and many other skilled and unskilled labours in similar new trends to join the industry.
